John T'Seleie  
Executive Director - Sahtu Land Use Planning Committee  
PO Box 235  
Fort Good Hope, NT  
X0E 0H0

Dear Mr. T'Seleie

**Re: Sahtu Land Use Plan**

Recently the Sahtu Land Use Planning Committee released Draft 1 of the Sahtu Land Use Plan. This document has generated significant interest from mining and mineral exploration companies that are currently operating in the Sahtu. As a group we are very interested in participating in this process.

The undersigned mining and mineral exploration companies have operations in the Sahtu area. We have met and agreed to form a working group of companies to participate in the land use planning process. Collectively we represent operations at all stages of development; from grassroots exploration to operating mines. This group of companies also represents a diversity of mineral interests including diamonds, uranium, zinc, lead, and tungsten. We have access to information, databases, and maps related to mineral occurrences and potential in the Sahtu and the expertise to interpret this information. We understand the potential environmental and social impacts of mining and mineral exploration work and are well advised in industry best practices for mitigation of negative impacts.

We are willing to make our expertise and resources available to the Board for the land use planning process. We feel that a land use plan that provides opportunity for responsible development of mineral resources will contribute to sustainable economic growth in the region will have a better chance of approval by all levels of government.

We invite the Board and Executive to meet with representatives from the group to discuss how we might assist in the development of the next draft of the Land Use Plan. Please contact Justin Himmelright of Selwyn Resources at 1.604.682.5474 ext. 222 to discuss potential dates for a meeting.

Kindest Regards,

**Cameco Corporation Ltd.**
